BWA Water Additives Reverse Osmosis Expert to Present at European Desalination Society Conference

MANCHESTER, England (May 1, 2014) – BWA Water Additives announced today that Suresh Patel, Ph.D., the world's leading authority on specialty polymeric antiscalants, will present at the European Desalination Society (EDS) Conference on May 14.

“The EDS Conference provides a wonderful opportunity for our RO experts to demonstrate and discuss new technology and trends in the industry,” said Marta Farriols, BWA Water Additives' VP of sales for Europe and Africa. “No one else in the industry is as well-versed on RO chemistry as BWA.” Farriols has been vice president of the EDS board of directors since 2012.

Patel will discuss best practices in treating Reverse Osmosis (RO) membranes and the potential for online monitoring of new polymeric antiscalants. Flocon[®] 885, the only biodegradable polymeric antiscalant on the market, is compatible with all major membranes and is certified to NSF/ANSI Standard 60 for use in RO systems producing potable water.

Attendees are invited to visit BWA at booth #07 or to attend Patel's technical session at noon on May 14 in room D, session 36.

For more information or to schedule a meeting with BWA, please contact diana.cruz@wateradditives.com

About BWA Water Additives:

BWA Water Additives is the leading global provider of sustainable water treatment technology solutions for the desalination, oil and gas and industrial water treatment markets. BWA antiscalant, corrosion inhibitor and microbiocide technologies provide customers with the essential elements required to meet today's water management challenges. For additional information please visit www.wateradditives.com .
