

Flocon® Membrane Solutions

Eight Elements for Clear Water

Technical Support

BWA provides laboratory support services for water and deposit analyses, membrane autopsies, chemical optimization and plant performance simulation.

Approvals Certifications

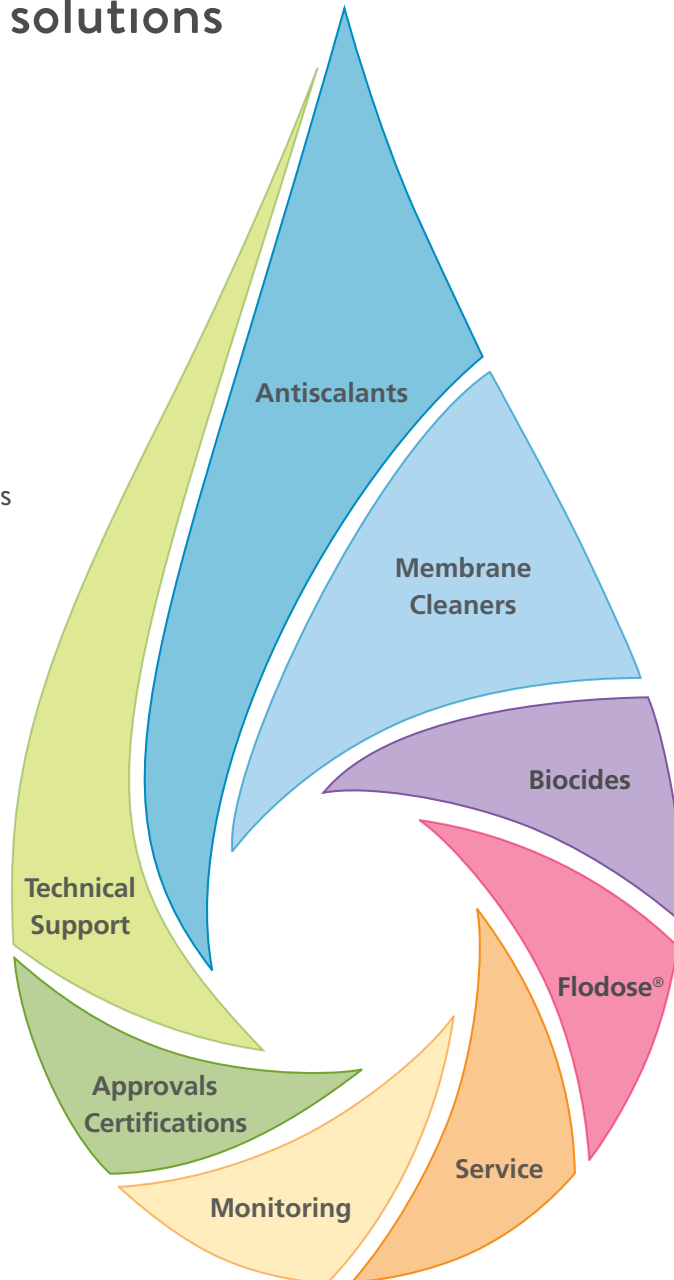

Our antiscalants carry worldwide membrane manufacturers' approval and NSF/ANSI Standard 60 certification for potable water.

Monitoring

BWA provides monitoring solutions for the control and efficient use of antiscalant in your Reverse Osmosis operation.

Service

BWA has dedicated service capabilities in meeting your on-site support needs. From cleaning consultation, chemical analysis and troubleshooting to operator training.

Antiscalants

Flocon® antiscalants are designed to prevent the fouling and scaling issues encountered in Reverse Osmosis operation.

Membrane Cleaners

Flocon® MC products offer cleaning solutions for restoring membrane performance by removing inorganic, organic, silt, silica and metal deposits.

Biocides

Flocon® biocides provide effective control of biofouling for on-line and intermittent use.

Flodose®

Flodose® is a web-based predictive tool for assisting in correct product selection and dosage optimization for your specific water chemistry.
