BWA Water Additives Showcases New Biocides and Water Additives for Formulators and Water Treatment Service Companies at Annual AWT Conference

BWA Water Additives will be hosting a session on its latest registered non-oxidizing biocide and new multi-functional water additives Thursday, October 31, 2013 at the Association of Water Technologies (AWT) annual convention in Uncasville, CT. The 8 – 8:30AM EST Commercial Corner session, entitled “New Non-oxidizing Biocides and Multi-functional Additives from BWA” will cover how the new Bellacide[®] 301 and Belcor[®] 585 products can help formulators and water treatment service companies improve cooling water treatment performance and program cost.

Additionally, BWA water treatment experts will present technical papers to AWT attendees:

- Cooling Water Track I - “Simplifying Cooling Water Formulations for Cost Reduction and Improved Performance”, Dr. Colin Hogan, Thursday, October 31, 2-2:30 PM EST
- Technologies Track I – “Using the Correct Antiscalant Chemistry in Reverse Osmosis Plants”, Dr. Suresh Patel, Saturday, November 2, 11:15 – 11:45 AM EST.

Visit BWA at booth #401/403. To register for the Commercial Corner presentation, please contact melissa.goeren@wateradditives.com.

BWA Water Additives is a global leader in sustainable water treatment technologies for industrial water treatment since 1973.
