## **BWA Water Additives Showcases New Bellasol<sup>®</sup> Oilfield Antiscalant and Recently Launched Bellacide<sup>®</sup> 350 at NACE Corrosion 2014**

Visit BWA at booth #2613 to learn about BWA's range of Bellasol<sup>®</sup> oilfield antiscalants which includes Bellasol<sup>®</sup> S65, a *new* biodegradable antiscalant that is hydrothermally stable to 200°C at pH 12, resistant to iron, and field detectable to 1 ppm.

Also learn about BWA's Bellacide<sup>®</sup> 355– the only fast acting and long lasting EPA registered biocide for hydraulic fracturing, produced fluids, pipeline, downhole, and topside applications. Bellacide<sup>®</sup> 355 is safer to handle than traditional biocides.

Attendees are also invited to attend two technical sessions where BWA technical experts will lead industry discussions:

- Technical Committee TEG 149X- “Biocide Application/Misapplication”, Monday, March 10th, 9AM-12PM EST, Room 007A
- Technical Committee TEG 503X- “Practical Applications of Water Treatment in Industrial and Commercial Systems”, Wednesday, March 12th, 3-6PM EST, Room 006C

For more information or to schedule a meeting with BWA, please write to [melissa.goeren@wateradditives.com](mailto:melissa.goeren@wateradditives.com).
