BWA Water Additives Showcases Two Events at the Annual AWT Conference: Building Blocks for Cooling Water Formulation and Biocide Biocides Reducing Cost Versus Other Non-oxidizing Biocides

BWA Water Additives announced today that it will be hosting a session on Thursday, October 30, 2014 at the Association of Water Technologies (AWT) annual convention in Fort Worth, TX. The 7:30AM EST Commercial Corner session, entitled “Cooling Water Building Blocks to Lower Cost and Increase Cycles,” will cover how to use BWA’s unique scale and corrosion chemistries to reduce the treatment cost and improve system operation.

Attendees are also invited to attend the technical session where BWA technical expert Jeffrey F. Kramer, Ph.D., will lead industry discussions:

- Track II- “Unique non-oxidizing biocide improves microbiological performance and reduces total cooling water treatment costs compared to traditional non-oxidizers”, Saturday, November 1, 2014, 11:45AM – 12:15PM EST.

Attendees are invited to visit BWA at booth #307/309 to learn about their range of product.

For more information or to schedule a meeting with BWA, please contact melissa.goeren@wateradditives.com.

About BWA Water Additives:

BWA Water Additives is the leading global provider of sustainable water treatment technology solutions for the desalination, oil and gas and industrial water treatment markets. BWA antiscalant, corrosion inhibitor and microbiocide technologies provide customers with the essential elements required to meet today’s water management challenges. For additional information please visit www.wateradditives.com.
