

LiquiBrom[®] 3800

www.wateradditives.com

Oxidizing Biocide for Industrial Water Systems

Description

LiquiBrom 3800 is a highly effective, concentrated sodium bromide solution for controlling microbiological growth in cooling water and industrial process water systems.

Application

LiquiBrom 3800 is a 38% active synergistic sodium bromide that provides:

- Great control of algae, and aerobic and anaerobic bacteria, all of which are unable to develop a tolerance
- Efficacy over a wide pH range of 6.5-9.2, with a higher percent active biocide at the higher pH
- Ready activation by a chlorine source such as chlorine gas or sodium hypochlorite
- Faster, more readily dissolved version than solid formulations
- Extended results when used in conjunction with Bellacide[®] 350 and Bellacide[®] 355

Benefits

LiquiBrom 3800 possesses approval for various applications found in a food & beverage environment.

LiquiBrom 3800 is an inorganic salt solution which does not degrade at elevated temperatures.

Usage

*Please consult with your BWA Water Additives representative to determine optimal dosage recommendations for your system.

Packaging / Weight

Bulk quantities available. Consult your sales representative for availability.

Physical Properties

Appearance	Clear to yellow liquid
Odor	Odorless
Active ingredient	38% (w/w) sodium bromide
Specific gravity at 21°C	1.39
pH (undiluted)	6-8
Boiling point	103-104°C (217-219°F)
Freezing point	Not available
Solubility in: - Water	Completely miscible

Further details are available in the safety data sheet
